STAND WITH UKRAINE

**The Clevereshka start-up
works for the benefit
of Ukraine & Ukrainians!**

**On the basis of our application,
we have created a program through which 600.000
Ukrainians will be able to become owners of their
own apartments in Kyiv, Odessa and other cities.**

The process will be fully regulated in our application.

We support the economy of Ukraine: every Ukrainian can open a store in our application for free and immediately get access to customers from around the globe!

We'd like to focus on helping with the reconstruction of Ukraine's infrastructure, assist in finding free housing for those who have been displaced

Additionally, every Ukrainian can receive a free virtual piece of land in the Clevereshka app and can build a house or open a business in it.
